C02. What do you feel is the least valued part of the sections?

32156. When the section was just straight revision from class, that was less helpful. (Even if hearing things again always helps to clear things up)

C03. What improvements (if any) should be made to the sections?

32156. The TA was excellent. To add some minor suggestions I would suggest the following:

I would add more exam-like or Q-exam-like questions.

I would also push a bit the professor to provide more guidance on homeworks in advance so that the TA is able to provide more helpful hints when students ask about homework.

I think in an ideal world, a TA could provide written notes about clarifications the professor makes verbally which are not often included in the slide deck. This was done some times, for example, with certain figures the professor did on the blackboard, but it would help to do it more often with other comments.

Also, the slides have a lot of wordy comments clarified by the professor in class, which, to me, are not always easy to grasp. Putting a bit of emphasis on repeating those might also help. (Though I understand this may not be crucial for exams)
